Is there an associated Privacy and Security Agreement required? Select

If so, select required agreement: Select

Is an Accepted Use Policy required? Select

If so, selected required agreement: Select

CISO cloud certification Select

Downloading data

Data download allowed Select

CISO download certification Choose

In the case that data may be downloaded, User agrees to download Project Data from the Platform only to a system that is centrally managed by the User's Organization and designed to host and protect

controlled access or sensitive data. In particular, the User agrees not to download data to a User's personal laptop or to any portable, non-encrypted media.

Authentication

CCSR shall only permit Authenticated Individuals to access Customer's Account or the Customer Material; provided, however, that CCSR personnel may access Customer's Account or Customer Material to the extent necessary to provide the Services. For the purposes of this Agreement, "Authenticated Individual" means a person or entity that has been authorized by Customer to access Customer's Account or the Customer Material using the authentication process agreed between CCSR and Customer (i.e., such person or entity is identified as an authorized person or entity in a Customer database of users which the CCSR may query).

Fees

There are no fees associated with the use of these services, but services may be limited via allocations and quotas to Users. It is important to note that the User may be able to launch additional services through the Platform that would be associated with the User's direct account with a Cloud Service Provider, for which there may be fees that would be payable to the Cloud Service Provider.
